STATEMENT

Replacement OBO PAREX 480

- The OBO EX-ISG-H series are our new generation of the spark gaps for EX and for ATEX application
- The new OBO EX-ISG-H generation will fulfil and surpass the same requirement of equipotential connection accordance IEC 62305-3 and the actually EX / ATEX regulations like our old version PAREX 480

Advance Information:

- The regulation of EX / ATEX application for spark gaps was changed / updated in the last years. The new OBO EX-ISG-H generation fulfil this new regulation.
- The old version OBO PAREX 480 are not tested about the newest EX / ATEX regulation (economic reasons)

We confirm:

- The new OBO EX ISG-H series are the official replacement of the OBO PAREX 480
- The production of the OBO PAREX 480 are stopped (economic reasons).
Remaining stock of the old version: 100 pcs.

Yours faithfully
OBO Bettermann Holding GmbH & Co.
